	5 Pro	wider Name				
		New	Edit	Delet		Temp *F

Scanning: Ensure Bluetooth is turned on in iOS settings. The X Series will find the iOS device. Here we see an iPhone. *Note customers have a habit of pair the iOS to the X Series. This is not best practice, always pair from the X Series to the iOS device*

Pairing: Using the navigation keys have the customer navigate to the iOS device. Select it using selector dot, not the green check mark. Have the customer navigate to Pair Now and select it.

<u>iOS Device</u>: Once Pair Now is selected on the X Series this message will appear on the iOS device. Have customer select Pair. Paired Devices: Now you will see the iOS device paired.
